**Subject:** Construction of Rail Line. Permit No. 95-986

The Corps has given me a copy of a letter from Bob Hrdlicka to the Corps dated May 22, 1996 in which a request for modification to the permit (above) was requested (West Wye Rail Line). The modification involved placing temporary fill in a proposed trestle area in order to provide adequate surcharge of the rail bed. The material was to be removed after 90 days and the area restored. According to Mikey Jones the work has not been done. The Corps is asking for confirmation that this was completed and the area restored. I believe this is your project, so could you send confirmation to the Corps. Thanks.
